

HOTEL GUEST ROOM CONTROL SYSTEM

Premium Touch Control & Guest Room Signaling Solution

INTRODUCTION

BETTER ROOMS. BETTER GUEST EXPERIENCES.

Every touchpoint in a guest room shapes the stay. This system pairs an elegant indoor touch panel with a coordinated outdoor status panel, giving guests a quiet, clear way to communicate their needs — without a single spoken word.

Do Not Disturb, housekeeping, laundry and light control sit behind a single glass surface indoors, while the outdoor panel gives passing staff an instant, illuminated read on the room's status. Finished in gloss black glass with softly illuminated touch icons, the system is designed to sit naturally within contemporary hotel interiors.

TOUCH FUNCTIONS
ON THE INDOOR PANEL

01

ILLUMINATED GLASS
GUEST INTERFACE

GUEST ROOM CONTROL SYSTEM

THE COMPLETE SYSTEM

ONE SYSTEM. TWO PANELS.

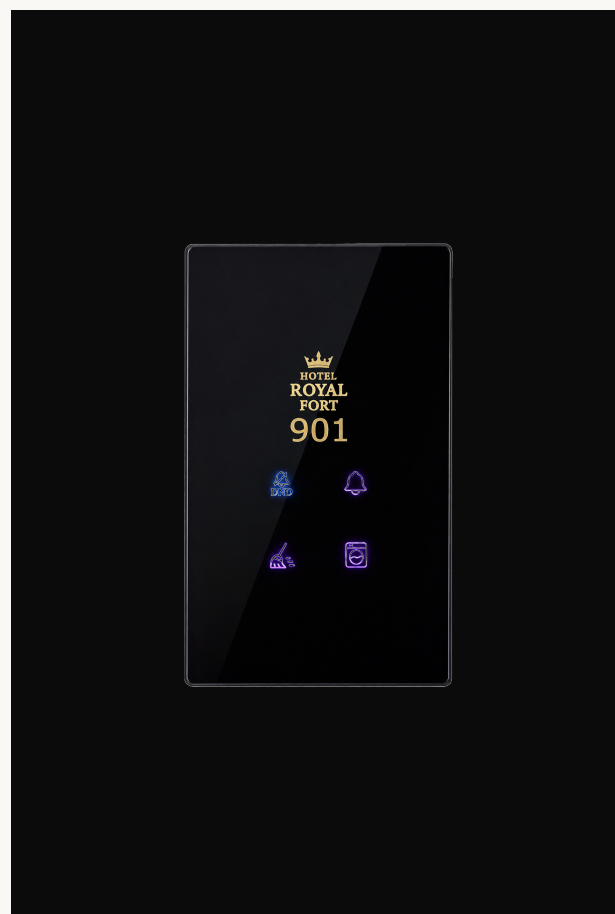

Positioned on either side of the guest room door, the two panels work together as a single, continuous line of communication between guest and staff.

INDOOR CONTROL PANEL

Guest-facing touch control, mounted inside the room
